

PROCTOR

AI-based proctoring solution for secure online and hybrid exams

Ensure exam integrity anywhere, anytime with next-generation AI proctoring

Your vision for learning. Our technology to protect it.

Constructor Proctor is an innovative AI-powered solution trusted by education institutions, certification centers, and corporations worldwide. It seamlessly fits into your learning or testing ecosystem, enhances exam security, and ensures fair outcomes - anywhere, anytime

Scale

Easily scale to 50,000 exams, 150 candidates per proctor, unlimited test durations (up to 72 h), and multiscreen setups

Integrate

Fit seamlessly with your LMS, assessment platform, or use link-based access

Monitor

Deliver secure exams with AI monitoring and flexible modes, **designed to support learners' special accommodation needs**

Analyze

Track sessions in real-time and gain insights from proctoring reports

AI review proctoring

The examinee can take the exam at any time. The session is recorded, and any violations are automatically flagged by AI. The final score is based solely on AI results, with no human proctor involved.

Post-exam review

The examinee takes the exam at any time under AI supervision. The session is recorded and later reviewed by a human proctor to check for rule violations.

Live review proctoring

A group of 8–20 examinees takes the exam at a scheduled time. AI monitors each session while a human proctor supervises participants in real time. Larger groups may require additional proctors.

AI capabilities for each mode

 Candidate identity verification	 Video, audio, and screen recording	 Detailed violation reporting	 Cheating probability detection
 Earbuds usage detection	 Differentiating conversations from background noise	 Facial, gaze & speech tracking	 Phone detection, side-view camera support

Key benefits

 Secure Browser Lockdown device access, prevent screenshots, block apps	 Open API Seamlessly integrate with 30+ LMS and assessment systems	 Identity verification Fast, reliable ID and document authentication
 Mobile application (Android & iOS) Extra camera view or secure mobile testing	 Advanced AI Security 100+ smart parameters - from gaze tracking to device detection	 Advanced live proctoring interface 24/7 live exam monitoring, manage up to 150 candidates

“We were impressed by the technical expertise and problem-solving skills demonstrated by the Constructor Tech team throughout the integration process. We believe this level of knowledge sets the company apart from others in the industry and gives us confidence in our ongoing partnership.”
